APPENDICITIENAND ITS CAUSE SIR LAUDEN BRUNTON'S NOVEL THEORY.

Some important madical papers were read at the Health Coppress at Birkenhand (over which Mr. W. H. Lever presided). Sir Lauder Bruving, the president of the

Preventive Medicine and Vital Stavitics Se tions gave it as his opinion that appendicities now so common apparent coincided with the elteration in the method

of grinding corn. Roch's discovery of the tubercular bacillus, he added, bad enabled us to combat with considerable success the white plague, consumption that foul disease which seemed to; carry off as its victims the most saintly, and most intellectual, the most enlatly, and most lovable of the household. We had now the knowledge which if properly and scientifically and constantly applied, would make consumption as gare is this country as isprosy was at the present time. But as one disease disapprared another seemed to come forward.

CONVEYANCE OF DISEASE.

The most pressing problem at present was to ascertain not only the nature of the microbes which cause diseases; but the means by which they were carried from one living body to another. Three years ago he had urged the establishment by the Government of a Chair, or, better still, an Institute, of Scientific En. tomology. This suggestion had received the approval of the Co'onial Office. The outcome of an inquiry made by Lord Crews was that the question was now being considered by the Government, and the Colonial Office had formed a committee for entomological research, It had sent out entomologists to East and West Africa, and was making arrangements for co-operation between entomologists. in all Protectorates with the British Museum, with the London and Liverpool Schople of Tropical "edicine, and with other institutions in the country. Euch co-operation would be of the greatest value, and they hoped that thereby many diseases might be practically abolished. (Cheers.)

PARTY WARFARE AND HYGIENE.

Prof. Sir William Ramsay devoted his address to sewage disposal. He advocated the establishment of morel efficient river boards urder's central authority. With this object, he said a Bill was drafted during the last Governme t when Mr. Walter Long was President of the Lucal Government-Boardy-Mr. John Burns, the present Fresident, had twice promised to introduce a similar Bill during last session and during the previous o e, but the exigencies of party werfare had randered its introduction impossible.

In fact, politics were now to such a state that few measures, however necessary or useful for the public good, had a chance of being considered unless they tended to draw attention to party differences; a measure approved of by both parties of the State ran little chauce of being introduced, and the days of private Bills were past. Such was the sad state to which our system of party government had come. a Prime Minister were to say to his Cabinet, "Gantlemen, let us consider for once what measures will secure the assent of our opponents and what will prove of greatest service to be of importance to the Colony or to shipping the country," he would not be listened to. GROUND LANDLORD'S DUTY.

The Town Planning and Municipal Architecture Section was presided over by Mr. H Vivian, M.P. In contrast to the injury wrough by the bad conditions prevailing in crowded city tenements, he said, the vital statistics of Port Sualight, Bournville, Letchworth, Hampstead, Eallog and other healthly laid-on estates brought out very clearly that with improved surroundings we practically got a new type of individual.

. In the great task that lay ahead the co-operation of all interests most as far as possible be secured. The great ground landlord must b invited to realise that some moral responsibility attaches to ground rest drawing A publicspirited and honest town council officials could do much to forward the work.

THE INPLUINCE OF THE HOME.

A special conference of Indies on domestic hygiene, child study, and social comomy was presided over by the Counters Grosve nor, who said sharwa glad of the oppor tunity to plead the cause of the thousands of factory girls who through their industry contributed so much to the revenue of the country as a whole. They were uncared for and little thought of; their work was monoton ous, and their life hard. There was a beautifu task for women by providing happy evenings of recreation and instruction to brighten the lives of these workers. Most of all was it the home they must strengthen and fortify, for there were many forces at work to undermine this sacred

At this section the Earl of Meath read a paper on the unwise sentimentality is our present aducational avel social influences, which was tending to weaken the moral fibre of children and becoming a serious national dauger, Wa were raising up a generation far too largely composse of men and women who had never been trained to put their whole souls minds and bodies into the performance of the duty of the moment he said. It was an vawise sentimen tality which pravented the State from dealing effectually with systematicad idlenass, which endeavoured to wesken the arm of law, distice, in the protection of society, against the violent, the criminal, the idle, and the evildoer

SOME RUBBER PLEW TOINTS.

As a parural contequence of the groat alten tion paid to rubber, during the past few years several of the class papers have made great efforts to provide specially intelesting features, and the latest we have come across is the "Rubber Investor" which classifies the comminies in five lots according to its idea of their comparative viluts. Whilit classification appears on the whole to err on the side of following the text books so to speak, it seems a good list, but it is peculiar to notice that I onden appears entirely ignorant of one or two very good things such as Balgownie There are some too who would be inclined to change the places of Merliman and Chers mase from one to two, in favour of such say as Shelferd Perat, Kuala Lumpur or Ledbury, but there will always be such a diversity of opinion 1520 about companies prospects that the list is protably as good a one as chuld be compiled I here is one satisfiction and that is that class five " Spiculative? does not contain the name of a single Malayan comp ny though we could supply the 'Rubber Investor" with quite a pice list it it would care for dollar companies.

WELL KNOWN CHINESE PLANT. WR IN COLOMBO.

A CHAT WITH THE HON, LIM CHIN TSONG.

has been on a business visit to London. The lucky to finish this trak on June s. Hoo. Chin Tsong was in England only a few months and it was his second visit. He was enchanted with the country and declares "There is no place like London-for business."

Mc Tsong, who wis framesly the pr prictor of Twante estate, near Rangoor, told a Times of Ocylon representative, that he had sold his property to two firms-Messre: Guibrie and Co., and Messes H. V. Lous and Co., and it had since been A ated by the Rangoon Para Rubber Company with a cipital of Lisyoop, | baving strock - I travelled another 400 miles to with a view to having it developed and further planted with subber. The properly, the Hon Ctin Tsong explained, was 4,200 scres in extent, of which acreage about 2,000 was of my ammunition, July 5, I left Tongoust by aircaly in subber cultivation when the sale wis the coa b, which suas for the benefit of tonists efficied and the Company proposed to plant who want to see the desp to Biskra, and so the zema ader.

The Hon Chin Tsong declared that his trees were as good as any in Ceylon and added that 'he production was highly satisfactory. Now he has anether plot of land -about a,000 acres in extent, lately planted-which is situated near the Sittang River, and which he is cultirating in subber,

ACROSS SAHARA. Hritish Officer's Daring Journey

HIS EXPERIENCES. That a young British officer should elect to spend a six months' fu lough from the West Coast of Africa in crossing the Sahara Desert is one of those things which only those can understand who know the spirit of adventure which possesses Roglishmon, says the Mail.

Captain A. H. W. Haywood, R.J., a young officer, serving in West Africa arrived in Rogland two days ag : from this adventurous trip. Sun-briwned and fatigued by the expotience, he till looks bick upon it with pleasure. Ho bus satisfied his curiosity, and he has added something to our knowledge of the great sandy plain.

Leaving Free Town, Sierra Loone, on Janmary 6. Captain Haywood spent two months in exploring and shooting in the country shout the source of the Niger and along that river. Reaching Bamako, on the Niger, the capital of French Sonegal and the Upper Niger Coleny, where he was most hospitably received by the acting-Governor, Captain Haywood ma'e his way by steamer to Niafunke, passing through In the same paper a planting writer calls Lake Dhebo, the great natural reservior of the ROUTE CLOSED BY HELT.

North of Adrar we came into a country in which there was no sign of water for the camels, wood for a camp fire, or yegeta ion-We now had to carry water for seven days and seven nights, and we ma ched almost continuously, taking but four or five hours' rest in the twenty four.

Day after day we endured the driving sand, which penetrated our nostrils, making them bleed, and the wind blew with such violence that it was impossible to pitch my small tent or prepare any food. For the last two or three Amongst the passengers who landed in days I ate nothing but dates and dank as Colombo, from the Bibby line s s. Hereford. Little as possible. #### OPIUM RESTRICTIONS.

From the exclusive information which we were enabled to publish yesterday, it be comes obvious that the British and the Chinese Governments are on the verge of disagreement as serious as any that has occurred in the history of the onlum trade: and there has been not a few. Perfidious Albion has been credited at one time or an other with foisting her Hindustan products of the poppy upon China to the detriment of the Chinesa beople. Even her own nations have denounced the Mother Country for her participation in a trade that Exclor Hall describes as pelatious and inhuman. But. as a matter of fact, the Chinese themselves, who are the most interested parly, have never had anything antagonistic to say against the import of the Indian drug-until recently. From the different Consular reports onon the open ports of China anyone can see that the Chinese who do lus of the terrible catastrophe that has beconsume opium prefer the Indian varieties | fallen the city of Tokyo and its neighbourof Paton of Beneres as against the hood, it is apparent that a great misfortune street by the owner of the articles. The Attorney-General-Perhaps it would be convenient for my friend to state the ground on which hois, making the application,

in It His Leviship - It is always better to avoid two arguments.

Mr. Slide-Yes, my Lord. In opening the case, Mr. Sla'e stated that he

made the application under Ordinance a o 1382, whereby the Governor-in-Council was empowered to probibit a parson frem residing in the Colony and to make an order for banishment. In purported pursuance of that section an older was made and served on the prisoner on Salurday last. The order stated that "Whoreis it was deemed desirable that the prisoner should not reside in the Colony for. file years he is hereby ordered to leave the Colony we him two days of this date " (toth August) The order was served on the prison. er on the 13 h August, and he was detained in Police custody will he should leave the Colony. The grounds on which the order way made out was because the prisoner was said to be associated with an unlawful si ciety for bringing men into the Colony to whem false promises are mads for pu.paies of emigration. That might mean anything-it might refer to an illegal partnership. Ilis argument was that prisoner had been given no opportunity to delend hims: 14. The Governor-in-Council f r Certain purposes was constituted a tribunal to adjidicate upon the rights of certain persons.

His Lordship-What is your right? Mr. Slado-Right of liberty.

His Lord hip-What is your right at bottom? Mr. Slade-The order has been illegally made and it's therefore not binding, because it has not given my client any opportunity to de-

His Lordship-You must keep yourself spictly within the Ordinance.

Mr. Slade-1'm going to ask your Lordship to keep yourself strictly within the Ordinacca I spect of dress s'ull which was supplied to upon the Governor-in-Council sthi rary power. The defendant alleged that the goods were ed therein absolutely applied to the Go ernorin Council .- The Governor la Council was not

an autocrat free to act as he pleased; His Loid ship-Supposir g there was no question of illegality. Supposing the Governor-in-Courcil decides to banish a person merly f. the peace of the Colony?

Mr. Slade, -The Governor's discretion caunot be interfered with. He can for itstance so without giving him an opportunity to show. he is two eyed.

Whit right has he? - Right of liberty. He has no right to be here . He is a lowed

to remain in the Colony.

If an Le. of Parliment is passed expelling at aliens then there's an end of it, but where preference is made in respect of certain aliens the Governor can't expel him without giving him an oppportunity to defend himseil.

Pests,-As Mr. Bailey is of opinion that much has lately been heard, all timber is being sticked and burned. All the land opened has been drained at intervals, of 5 chains, in place of 10 chains as heretofore, and all drains have been deepened. The estimate of expenditure on Bukit Kraing for : 910 is amounts to £3,500. and provider, in addition to the upkeep of 635 acres, for the draining and felling of all the re-I maining forest, except 49 acres to be kert as a

The expecditure on Athlona is estimated £2,000, which provides for the opening of at scres in rubber, and the fe'ling and draining of a faither 500 acreva portion of which may also if found practicable, be planted.

Mr. Bailey reports the estates is looking healthy and well, and that a'l the young rubber has mude splesdid growth. With the attention which he is giving to white ants and fomes it is thought that these need not by feared. I e reports that there is no disease of ary kied in the young rubber clearings. There is ecough upper back remaining to last for nearly another year on most fields. The renewed back has come on sitisfactorily, and the small portion tayped in March 1910 has yielded Tung, is to act as officiating governor of well. There are therefore large reserves of bark sufficient to last for four or five years while renewal is in process. All drains have been deepened and the estates are clear. Seme additions will have to be made to mich nery and a new factory will be erec'ed. The Canton Central Relief Committee at once Mr. Bailey reports the sisff as baving doce excellent work. Almost all of the sesson's crop frem the cl ; subber has been obtained as a result of upper tapping which necessitates the use of ladders. The directors consider that having this in view the cost of production and references is remarkably lew, and great credit in consequently due to Mr. Bailey and to these ssio"
